

Инструкция по настройке ADSL модема Zyxel P-660 Series v1

- 1. Откройте на компьютере веб браузер, например Internet Explorer.
- 2. В строке адреса наберите 192.168.1.1
- 3. Появится предложение ввести пароль для входа в меню модема. Введите пароль 1234.

	Prestige 660HW-T1
E	Enter Password and click Login.
Password:	
	Login Cancel

Далее будет предложено сменить стандартный пароль 1234. Вводим новый пароль с подтверждением и продолжаем настройку.

We recommend that yo password by changing it	u personalize the system administrator t to something besides the default '1234'.
The administrator passy characters.	word should must be between 1 - 30
New Password:	•••••

4. После этого вы увидете основную страницу веб-конфигуратора модема. Нажмите на "WAN"

Откроются настройки WAN - интерфейса модема. Выставляем параметры как показано на рисунке. В полях User Name и Password введите логин и пароль для доступа в интернет, выданные компанией Элитком. Поле Service Name оставляем пустым, значения параметров VPI и VCI (0 и 40 соответственно). Кнопка Apply.

Переходим в меню по настройке беспроводной сети Wireless LAN которое выглядит как на рисунке выше. Нажмите на первый пункт "Wireless". Выставляем параметры как показано на рисунке. Кнопка Apply.
